

LIDAR BEN-DOR

AI Engineer & Software Engineer

054-6735816 | lidar210599@gmail.com | [GitHub](#) | [LinkedIn](#) | [My Site](#)

Profile:

Passionate software engineer and AI engineer. Experienced in developing full-stack applications and AI agent solutions using **Python, React, TypeScript, C# and .NET**. Proven ability to deliver end-to-end solutions in fast-paced startup environments. Ambitious, autodidact and team player, excited to tackle new challenges. **Seeking a position as an AI Engineer / Software Engineer.**

Professional Experience:

AI Engineer, Automatiq.ai

2025 – Present | Full-time

- Building custom AI agent solutions for enterprise clients across industries including real estate.
- Design and develop end-to-end agentic pipelines, from requirements to deployment, tailored to each company's workflows and business needs.

Full Stack Developer & Research Assistant, Tel Aviv University

2025 – Present | Full-time

- Designing and developing applications for neuroscience research, integrating software development with experimental brain studies.

Full Stack Developer, Taliaz

2024 – 2025 | Full-time

- Contributed to all development phases as a team member at a mental health care startup.
- Built and maintained backend services using Python, leveraging Xano for data storage.
- Developed frontend interfaces using JavaScript, CSS, and Retool.
- Gained experience in programming with prompt languages to enhance application functionality.

Frontend Developer, Deep Void

10/2023 – 02/2024 | Part-time (during reserve military service)

- Designed and implemented UI features with TypeScript and React.

Technologies (Hands-On experience):

Languages & Frameworks: C/C++, C#, Python, JavaScript, TypeScript, React, .NET, FastAPI.

Tools & Platforms: Git, Linux, Docker, Postman, SQL, AWS, Jira.

Concepts: OOP, Design-patterns, Multithreading, REST APIs, TCP/IP, sockets programming.

Education:

- Reichman University (2025 – 2027)
 - M.Sc. Machine Learning and Data Science.
 - Relevant Coursework - Statistics and Data Analysis, Data Streaming Algorithms, Machine Learning, Reinforcement Learning.
- The Academic College of Tel-Aviv, Yaffo (2020 – 2023)
 - B.Sc. Computer Science | **Dean's list 2nd year.**
 - Relevant Coursework - Software engineering (95), Data structures, Databases (91), Operating system (Linux), Algorithms, Object Oriented Programming (100), Design Patterns (96).

Personal Projects:

- **SmartByte - FastAPI, React, TypeScript, Docker** | [GitHub](#)
End-to-end AI recommendation platform that analyzes user intent in Hebrew, matches products intelligently, and provides a full admin analytics dashboard.
- **Checkers Game - C#** | [GitHub](#)
Designed a two-player game using events, delegates, and WinForms UI.
- **Facebook API App - C#** | [GitHub](#)
Added two features to Facebook via its API, with UML design and WinForms.
- **Coupon Management System - C# .NET, MySQL** | [GitHub](#)
Admin panel, RESTful API, and dynamic coupon validation logic using Entity Framework.
- **Pacman Console Game - C++** | [GitHub](#)
Console-based Pacman game focuses on logic and control handling.

Volunteering:

The Shual Foundation (2025) | Lead Instructor (Sep 2014 – Sep 2017)

Military Service:

Unit 9900, IAF Intelligence (Apr 2018 – Apr 2020)

- Strategic observation analyst. Awarded "Locator of the Year" for key intelligence contribution.
- Led two research projects for senior military leadership.

Language:

Hebrew - Native | English - Fluent
